

## ELECTRIC RATES – May 2018

\*A standard service charge is assessed on all accounts. Amounts vary by Rate Schedule.

\*Energy Charges are applied to kilowatt hours and vary based on season. Summer months are June through September. Winter months are December through March, and transitional months are October, November, April, and May.

\*The Fuel Cost Adjustment (FCA) is applied to kilowatt hours and varies each month. It allows TVA to recover costs associated with the dynamic price of market-based fuels and purchased energy costs.

| <b>Residential Service</b>     |         |
|--------------------------------|---------|
| Standard Service Charge        | \$17.81 |
| Energy Charge (per kWh)        | .06390  |
| Fuel Cost Adjustment (per kWh) | .02026  |
|                                |         |

| <b>General Power Service Part 1 (GSA1)</b> |         |
|--|---------|
| Standard Service Charge                    | \$19.41 |
| Energy Charge (per kWh)                    | .07872  |
| Fuel Cost Adjustment (per kWh)             | .02002  |

| <b>General Power Service Part 2 (GSA2)</b> |                               |
|--|-------------------------------|
| Standard Service Charge - \$65.00          |                               |
| Demand Charge, first 50 kW                 | Demand Charge, over 50 kW     |
| \$0.00                                     | \$12.63                       |
| Energy Charge, first 15,000 kWh            | Energy Charge, additional kWh |
| .0804                                      | .03561                        |
| FCA, first 15,000 kWh                      | FCA, additional kWh           |
| .02002                                     | .01974                        |

| <b>General Power Service Part 3 (GSA3)</b> |                              |
|--|------------------------------|
| Standard Service Charge - \$160.00         |                              |
| Demand Charge, first 1,000 kW              | Demand Charge, over 1,000 kW |
| \$11.70                                    | \$11.65                      |
| Energy Charge (per kWh)                    | Fuel Cost Adjustment         |
| .03973                                     | .01974                       |
