

Seeing a lot of ads for solar panels?

If a sales pitch sounds too good to be true, it likely is! Before you invest your hard-earned dollars in solar panels, make sure the company with which you are working has a **Solar PV Installation Professional Certification** from the North American Board of Certified Energy Practitioners – the gold standard for the industry!

While BGMU is not affiliated with any solar companies, we will be happy to answer your questions about initial costs vs. possible savings! Call us today at 270-782-1200.

Fire Hydrants — Help us keep you safe!

Did you know that BGMU maintains over 2000 fire hydrants? While it may be aesthetically pleasing to keep them covered with plants and tall grasses, it can make hydrants difficult to locate during fires and other emergency situations. Additionally, vegetation growing close to hydrants traps dirt and moisture, causing deterioration of paint and premature wear.

Please keep a 4 foot clearance around all hydrants. Thank you for helping us keep customers safe!
